

Vela Ultra compact line sources

- V series family - Lightweight
- 138dB max SPL
- 40m throw capability
- Fixed installation
- 110° Horizontal
- Plug and play
- VDA12 Controller
- Weight 11kg

Vela is long throw compact line array speaker designed for medium distance sound reinforcement applications with minimal visual impact.

Vela is equipped with two 6.5 inch speakers and one 1.75-inch diaphragm compression drivers in the bass reflector.

Vela has an excellent sound pressure level thanks to the design and power of the subwoofer. The maximum box impedance is 16 ohm.

The frequency of Vela is 70Hz-20kHz, with 110 °symmetrical horizontal directivity output. It has smooth response in the whole frequency range. In order to maintain the wavefront coherence, the maximum element angle is 12 ° and the internal passive frequency division network uses custom filter.

VDA12/VDA18 power amplifier can ensure linearization and protection.

Voe

Vela

The latest release of QANON AUDIO is **Vela / Voe**, a small linear array speaker suitable for various sound reinforcement styles. Combined with the "excellent dynamic range and high performance" and "compact and durable high quality" of Qanon Audio **V10**, it can be used in **fixed installation** and **small-touring**, and can be installed and used quickly.

Physical Data

The enclosure made of birch plywood, which has high moisture resistance and impact resistance, and has remarkable acoustic characteristics. Vela weighs only 11kg / 24.2lb, and its compact elegance makes it easy to integrate in any case. White or black or dark gray, can be integrated into any building. The rated protection grade of the enclosure is IP45. The flush mounted hanger has the function of visual safety inspection.

Vela Design concept

Vela use 2-way passive design , Two 6.5 inch neodymium magnetic low-frequency drivers and one 1.75-inch neodymium magnetic throat drivers are loaded. It is equipped with special strange sound speakers and adopts the same high-frequency Waveguide Horn technology as V series, which is suitable for frequency response phase coupling with all V series speakers.

The vertical plane correlation generated by its compact structure effectively reduces the internal turbulent noise, obtains the natural and strong low-frequency response of the box, and the balanced distribution of low-frequency and high-frequency drivers. In addition, the smooth coverage angle of the constant pointing 110 ° high-frequency horn can provide excellent consistent frequency response characteristics even in the off-axis area, The high-strength metal pendant can cascade up to 12 speakers in a vertical plane, and its vertical spacing angle can be adjusted with an accuracy of 2 degree between 0 ° ~ 12 °. Both in terms of energy output and coverage, vela acoustic performance has been improved to a higher level.

Product compatibility :

Vela is a true full range speaker. With extremely wide full frequency bandwidth and compact, the two features are compatible. The frequency response range is 70Hz to 20kHz. With VDA12 amplifier, the frequency response and phase curve can be exactly the same as that of V series, and the maximum sound pressure level can reach 138db. To obtain so much energy in such a compact structure, QANON adopts low-frequency laminar flow direct guidance technology, which is the same as that of ultra-low Vela-L speaker, Coupled with V18 excellent low-frequency dive and high-end extended phase coupling, the frequency bandwidth can be extended to 30Hz, so as to give full play to Vela energy.

Vela-L Subwoofer

- V series family - Lightweight
- 134dB max SPL
- Simple and fast
- Increase of efficiency
- Horizontal or vertical
- Plug and play
- VDA Series Controller
- Weight 33kg

The Vela-L features one direct radiating 15" speaker in a bass reflex tuned enclosure. It provides impact, sensitivity, low thermal compression and reduced distortion. The vent features a progressive profile allowing laminar airflow and reduced turbulence noise even at the highest operating levels. These combined properties contribute to the sonic qualities of the Vela-L in terms of precision and musicality. The cabinet is made of first grade Baltic birch plywood to ensure maximum acoustical and mechanical integrity.

Vela-L subwoofers can be flown or ground-stacked as a standalone array or within a vertical Vela-L / Vela array. A pole-mount socket is integrated into the cabinet, for the mounting of one M and TC enclosure or two Vela enclosures.

VDA12 DSP controller

- 4 Input x 4 Output Analog Type
- 1 Input AES3 Digital Type
- 2 x RJ45 etherCON® (IN/OUT)
- 4 x NL4 SpeakOn
- Max 2 enclosure in parallel For Vela-L
- Max 8 enclosure per controller For Vela-L

VDA12 VDA18 Controller

VDA12

- 4 x 600W RMS 16Ω
- 4 x 1200W RMS 8Ω
- 4 x 2000W RMS 4Ω
- 4 x 2000W RMS 2.7Ω

VDA18

- 4 x 1800W RMS 8Ω
- 4 x 3600W RMS 4Ω
- 4 x 4000W RMS 2.7Ω

VDA12 is the recommended amplified controller for Vela with 4 enclosure per output channel. This configuration delivers amazing plug-and-play performance and allows users to leverage the VDA Controller software optimization tools to further optimize the system response.

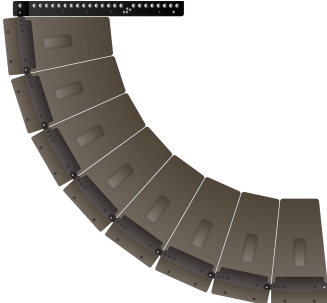

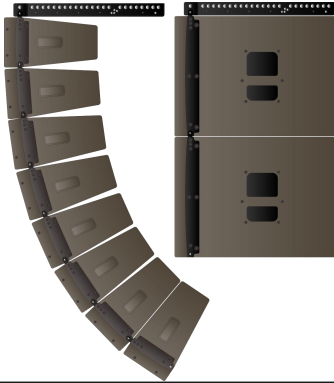

VDA18 can be used to power and control up to 6 Vela per output channel. This configuration simplifies deployment and cable management but reduces optimization capabilities.

Use combination - 1

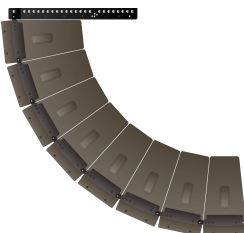

Vela is a multifunctional solution that can be deployed in a wide variety of ways to address most applications. Vela can stand on its own for small to medium sized events or complement a variable curvature system on larger applications.

9 Combinations:

		
2 Vela + 1 VelaL	4 Vela + 2 VelaL	4 Vela
		
4 Vela + 1 VelaL	4 Vela + 2 VelaL	8 Vela + 2 VelaL
		
8 Vela	8 Vela + 2 VelaL	8 Vela + 2 VelaL

Use combination - 2

Vela Technical Specification

Vela Technical Specification

Type	2-way passive line source enclosure
Frequency Response	70Hz-20kHz
Amplifier Recommend	VDA12
Preset	[Vela] FOH / [Vela] FI
Horizontal	110°
Angle Increments	0° 2° 4° 6° 8° 10° 12°
Drivers	LF:2×6.5" Neodymium HF:1×1.75" Neodymium
Handling Power (AES)	LF:400W HF:60W
Maximum Peak SPL	138dB/1m
Nominal Impedance	16Ω
Connections	2 x NL4 SpeakOn
Pin Connections	NL4=LF: +1-1
Height Front	187mm
Height Back	126mm
Width	500mm
Depth	350mm
Weight	11kg / 24.2lb

Rigging and Handling

Handle	2 ergonomic handles
Antiskid	N/C
Fastener	3 side fastener

Physical Data

Material	Baltic Birch Plywood
Finish	Dark Grey
Front	Polyester powder-coated steel grill
Rigging	Steel
Protection rating	IP45
